### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art on page 1, line 20 to page 3, line 20 of the instant specification in combination with Hoyt (U.S. Patent 5,728,226 A).

The admitted prior art teaches a process of operating a spinning device as claimed, including the steps of closing apertures with plugs and subjecting a device to pyrolysis (or heating). The admitted prior art does not explicitly teach subjecting a device to a second heating (oxidation) treatment. Hoyt (see the entire document, in particular, col. 1, lines 27-

44) teaches a process of operating a spinning device including subjecting a device to a first heating (e.g., pyrolysis) treatment and then subjecting the device to a second heating treatment, wherein the second heating treatment is performed in air and thus, the second heating treatment is oxidative in nature. It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the disclosure of Hoyt with the admitted prior art principally in order to clean a spinning device and to remove the plugs without having to use additional materials (i.e., solvents).

#### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references are of interest. Note that U.S. Patent 5,011,541 A is equivalent to DE 4017296 A1 (cited by applicant).
